

EdenPURE™ GEN3

Quartz Infrared Portable Heater

A brief interview with the Director of Product Development for BioTech Research, Julius Toth...

● **What is the origin of this amazing heating element in the EdenPURE™ GEN3?**

This advanced heating element was discovered accidentally by a man named John Jones. He had a large old farmhouse that was impossible to heat. Jones had a coal furnace in his basement. Jones placed a sheet of cured copper near the furnace to store it. Cured copper is a type of copper that goes through an extensive heating process to give it special properties.

After the fire went out in the coal furnace, Jones noticed that the sheet of copper was heating his entire basement evenly, even though the furnace was no longer putting out heat. He also was amazed as to how long the heat stayed in the copper and continued to warm the room. To make a long story short, through a great deal of research and development, Jones developed a heating source that utilized commercial infrared quartz tubes with the copper that could not start a fire.

● **Why is it that this quartz infrared heating source uses less energy to create heat than other sources?**

Actually, there is more than one reason. One of the primary reasons is that heat at combustion level, which is what all other heat sources use, causes the heat to instantly rise to the ceiling. Therefore, the heat is not evenly distributed, causing a very inefficient and uncomfortable heat source.

The EdenPURE™ GEN3 Quartz Infrared Portable Heater does not use burning heat. Once the heat exchanger absorbs the infrared heat, it exhales the heat into the living area carried by the existing humidity in the air.

In actual studies, photos using infrared lighting demonstrated that the heat was almost perfectly even from floor-to-ceiling and wall-to-wall.

● **What are the other disadvantages of combustion heat sources?**

Heat sources that are above the burning level have many unhealthy side effects. One of these is that they create dry, irritating indoor air. They also burn a great deal of oxygen in the air. If you remember, when you sit in front of a fireplace or a portable heater or close to a heat source, you will remember yawning. This is because you are not getting enough oxygen.

This dry irritating heat and lack of

oxygen dries out sinuses and mucus in the throat, and makes people susceptible to disease. The lack of oxygen causes fatigue.

Also, many combustible heat sources produce carbon monoxide, static cling, and some produce radiation.

● **So you're saying that children or pets can come up to this unit and touch it and not be harmed?**

That is absolutely correct. As a matter of fact, pets are actually drawn to this heat because it is a natural source of heat, just like the sun heats the earth. Animals are much more instinctive than humans.

● **How can a person cut their heating bill by up to 50% with the EdenPURE™ GEN3?**

First, the EdenPURE™ GEN3 uses less energy to create heat than other sources, but that is just part of why it will cut a person's heating bill. The EdenPURE™ GEN3 will heat a room in minutes. Therefore, you can turn the heat down in your house to as low as 50 degrees, but the room you are occupying, which has the EdenPURE™ GEN3, will be warm and comfortable.

The EdenPURE™ GEN3 is portable. When you move to another room, it will quickly heat that room also. This can drastically cut heating bills, in some instances, by up to 50%.

● **I also understand that the EdenPURE™ GEN3 produces clean fresh air without furnace filters. How can it do that?**

A furnace generates a lot of dust due to the combustion. By lowering the furnace temperature, you are using your furnace less and therefore reducing the requirement for the furnace filters.

● **So, the EdenPURE™ GEN3 can pay for itself quickly?**

The EdenPURE™ GEN3 will pay for itself in weeks. It will put a great deal of extra money in a users pocket. Because of today's spiraling gas, oil, propane, and other energy costs, the EdenPURE™ GEN3 will provide even greater savings as the time goes by.

The EdenPURE™ GEN3 comes in 2 models. GEN3 Model 500 heats a room up to 300 square feet and GEN3 Model 1000 heats a room up to 1,000 square feet.
