

## Regency Wood Burning Stove

*F2400m Medium Flat Top*

|              |             |
|--------------|-------------|
| BTU          | 75,000      |
| Efficiency   | 77%         |
| Log Size     | 18"         |
| Weight       | 298LBS      |
| Flue Size    | 6"          |
| Firebox Size | 2.3 cu. ft. |
| Burn Time    | up to 8 HRS |

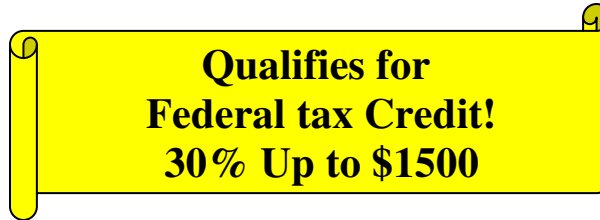

- EPA Certified
- Mobile Home Approved
- Closest Clearances in the industry
- Single Rod Draft Control
- Brick Lined Firebox
- Airwash System

**Exceptional Wood Fire:** The glowing embers.. the snap of the wood as it catches fire.. the curl of the flames...revisit the charms of a wood fire. Take a look at Regency - a beautiful wood fire surrounded by a classically designed fireplace, as practical as it is aesthetically pleasing.

**Environmentally Friendly:** All Regency Wood Stoves, Fireplaces and Inserts have been certified by the Environmental Protection Agency. Regency engineers have carefully designed the firebox to create airflow around the wood so that it burns completely, resulting in very little ash and next to no polluting smoke into our environment.  
In addition, wood is renewable, carbon neutral fuel source.

**Clean Burn:** The efficiency of up to 77% means any room can be heated quickly. All Regency Classic stoves exceed the DEQ Washington Phase II Clean Air Standard of 4.5 grams/hr or less. You can burn your Regency anytime, because it has been designed for clean burning.
