

# Model PL to DT Direct Vent 3" and 4" Pellet and Corn Stove

- Model DT has a 1" minimum airspace clearance to combustibles requirement when used as L vent. This applies whether DT is being used to bring outside air to the pellet appliance or not.
- Do not fill this space with insulation or any other material.
- This airspace is required for the safe operation of the vent. Model PL has a clearance to combustibles requirement of 3" (Combustibles including: framing lumber, drywall plaster, plywood, paneling and other building materials.)
