

Hi-VAWT Products

DS300 - 400 watts

Output Voltage 12,24 volts
Output Current 20 amps
Cut-In Wind Speed 6.7 mph
Rated Windpeed 34 mph
Diameter 3.7 feet
Height 4.8 feet

DS1500 - 1.5 kW

Output Voltage 48 volts
Output Current 60 amps
Cut-In Wind Speed 5.5 mph
Rated Windpeed 26 mph
Diameter 9.2 feet
Height 9.8 feet

DS3000 - 3.0 kW

Output Voltage 48 volts
Output Current 130 amps
Cut-In Wind Speed 5.5 mph
Rated Windpeed 33 mph
Diameter 13.1 feet
Height 18.4 feet

Minnesota Incentives

Sales Tax Exemption:

Wind-energy conversion systems used as electric-power sources as well as materials used to manufacture, install, construct, repair or replace wind-energy systems are *exempt* from the state sales tax.

Property Tax Exemption:

Minnesota excludes the value added by all real and personal property of wind-energy systems from the state's property tax.

Federal Incentives

The Energy Improvement and Extension Act of 2008 provides for a 30% federal tax credit.

*This credit is in effect until
December 31, 2016.*

*Minnesota law provides for the
creation of wind easements for
wind-energy systems.
(voluntary contracts)*

*For tax purposes, an easement
imposed on a property may
decrease the property value, but
an easement which benefits a
property may not add value to
that property.*
